

Cox Enterprises & Radiance Solar

Partners in installing
Georgia's largest
commercial solar thermal
hot water system.

The System:

- ❖ 40 4'x 10' Solar Thermal Collectors
- ❖ 2,000 gallons of hot water storage
- ❖ 300 million BTUs per year in clean, renewable energy
- ❖ 50 percent offset in water heating energy costs
- ❖ 25+ year expected system life

About Radiance Solar

Radiance Solar is an
Atlanta based renewable
energy company
providing turnkey solar
photovoltaic and solar
thermal installations.

The Manheim Solar Thermal Story

Radiance Solar completed the state's largest commercial solar thermal hot water installation at the Manheim Georgia facility in Atlanta, Georgia in May of 2009. The system offsets more than 50 percent of the facility's hot water heating needs and reduces Manheim's environmental impact. The system is expected to last 25+ years and will provide a significant positive return on investment during its useful life.

The Manheim solar thermal install is an example of the type of best-in-class installation that Radiance Solar's customers can expect.
